

# PRESSURE SELECTING HYDRAULIC CONTROL (SHUTTLE VALVE)

## Model 50-XM

This pressure selector shuttle valve has been designed to automatically direct the higher between two pressure sources into a control or sensing chamber, each source is applied to a different port. The higher pressure creates a superior force that moves the inner plug to seal the counter port, allowing water from the higher pressure source to flow through the common port.

### Technical Data

**Pressure rating:** 400 psi

**Ports:** 1/8" NPT Female thread

**Maximum temperature:** Water up to 180°F

### Standard materials:

**Body:** Brass

**Elastomers:** NBR

**Sealing Knob:** Stainless Steel
