

# ELECTRICALLY CONTROLLED ON-OFF DELUGE VALVE

# Model FP-400Y-2D

The BERMAD model 400Y-2D is an elastomeric, hydraulic line pressure operated deluge valve, designed specifically for advanced fire protection systems, and the latest industry standards. The 400Y-2D is activated by a 2-way solenoid valve, suitable for electric fire detection systems and is ideal for open nozzles with water or foam discharge. Available with electric components to suit any hazardous location and offered with an optional visual valve position indicator that can include a limit switch suitable for Fire & Gas monitoring systems.

#### Features & Benefits

- Safety and reliability
  - Time proven, simple design with a fail safe actuation
  - Single piece rugged elastomer, VRSD technology
  - Obstacle-free, uninterrupted flow path
  - No mechanical moving parts
  - Shuts off on remote command
- High performance
  - Very high flow efficiency
  - Approved for PN25 / 365 psi
  - Straight through Y type body
- Specifically-designed for fire protection
  - UL429A Listed 2-Way Solenoid Valve
  - Face-to-face length standardized to ISO 5752 EN 558-1
  - Meets the requirements of the industry standards
- Quick and easy maintenance
  - In-line serviceable
  - Fast and easy cover removal
  - Swivel mounted drain valves (for valves 3" and larger)

## **Approvals**

UL-Listed Special System Water Control Valves, Deluge Type (VLFT) Sizes 11/2" - 16"

Det Norske Veritas Type Approval Sizes 1½" to 16"

ABS American Bureau of Shipping Type Approval Sizes 1½" - 12"

Lloyd's Register Type Approval Sizes 1½" - 10"

## **Typical Applications**

- Electric fire detection systems with control panels
- Remote Control Water Spray Systems
- Foam applications
- Corrosive water systems

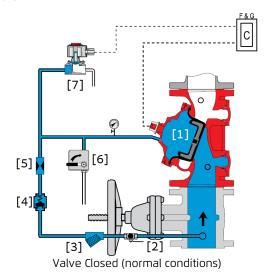

#### **Additional Features**

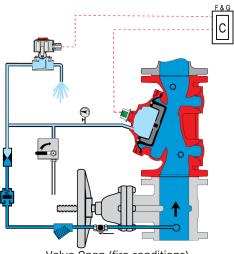

- Valve position limit switches
- Local valve position indicator beacon
- Seawater compatibility
- Alarm pressure switch
- Drain valve/s inlet/outlet
- Corrosion resistant zinc based high build epoxy coating

# **Operation**

FP-400Y-2D

Valve Open (fire conditions)

The BERMAD model 400Y-2D is held closed by water pressure in the control chamber [1].

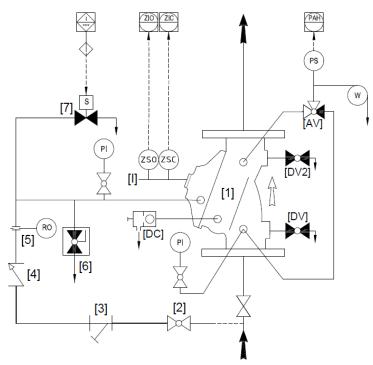

Upon release of pressure from the control chamber, the valve opens.

Under NORMAL conditions, water pressure is supplied to the control chamber via the priming line [2], restriction orifice [5] and strainer [3], and is then trapped in the control chamber by a check valve [4], manual emergency release [6], and a 2-way Normally De-Energized solenoid valve [7].

The water pressure trapped in the main valve control chamber holds the diaphragm against the valve seat, sealing it drip-tight and keeping the system pipes dry.

Under FIRE conditions, water pressure is released from the control chamber, either with the manual emergency release, or by the solenoid valve being energized by the fire & gas control system [C]. This opens the 400Y-2D deluge valve, allowing water to flow into the system piping and alarm devices.

#### System P&ID

	Components						
1	BERMAD 400Y Deluge Valve						
2	Priming Ball Valve						
3	Priming Strainer						
4	Check valve						
5	Restriction Orifice						
6	Manual Emergency Release						
7	2-Way NC Solenoid Valve						

	Optional System Items						
PS	Pressure Switch						
W	Water Motor Alarm						
ZS	Limit Switch Assembly						
DV2	Downstream Drain valve						
- 1	Visual Valve Position indicator						
DV	Drain Valve*						
PI	Pressure Gauge*						
AV	3-way Alarm Test Valve*						
DC	Automatic Drip Check Valve*						

<sup>\*</sup> Included with suffix A in valve code (drain and indicating components) See code designations and "factory supplied additional items" on page 4

Deluge Valves

## System Installation

A typical installation of the BERMAD model 400Y-2D features actuation via a 2-way solenoid valve, triggered by a signal from a fire & gas control system or an on-site emergency pushbutton.

When open and fitted with a limit switch the valve can send a feedback signal to a remote valve status monitoring system.

## **Optional System Items**

Pressure Gauge

Visual Position Indicator

Rotating Limit Switch Box

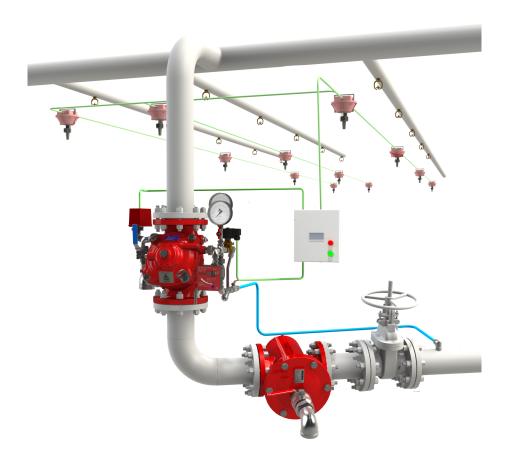

Exd Pressure Switch - Stainless Steel Enclosure for Harsh

Environments

60F

# **Suggested Specifications**

The deluge valve shall be UL-listed, 365-psi/25-bar rated, with a straight-through, Ytypebody.

The valve shall have an unobstructed flow path, with no stem guide or supporting ribs.

The deluge valve shall have no mechanical moving parts, and the actuation shall utilize a single-piece diaphragm assembly of VRSD technology.

The valve shall be coated internally and externally with UV protection. Optional: C5-VH grade of ISO-12944 standard against corrosive conditions.

The solenoid valve shall be a 2-way FM and UL429A-listed for 365 psi/25 bar with 65% of the rated voltage.

The control trim shall include a manual emergency release unit, a Y-type strainer, two 4-inch pressure gauges, an automatic drip-check with manual override, and a ball drain valve with a 360 degree swivel.

A valve position indicator shall be provided, and equipped with two proximity limit switches.

Removing the valve cover for full inspection and maintenance shall be in-line and not require removal of the control trim.

The deluge valve and control trim shall be pre-assembled and hydraulically tested by a UL/FM and ISO 9000, 9001 certified factory.

Deluge Valves

#### **Technical Data**

#### **Available Sizes:**

Flanged- 11/2, 2, 21/2, 3, 4, 6, 8, 10, 12, 14 & 16" Grooved- 1½, 2, 2½, 3, 4, 6, 8 & 10"

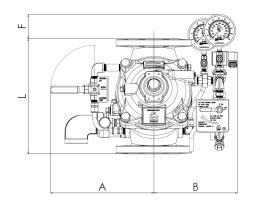

#### Pressure Rating:

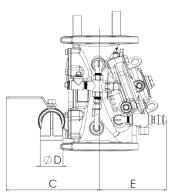

ANSI#150 - 17.2 bar | 250 psi

ANSI#300 - 1½" to 10" - 25 bar | 365 psi ANSI#300 - 12" to 16" - 20 bar | 300 psi Grooved - 17.2 / 25 bar | 250 / 365 psi

#### Elastomer:

HTNR - Fabric Reinforced High Temperature Compound - See engineering data
