Typical Applications

- Automated Irrigation Systems
- Remote and/or Elevated Systems
- Distribution Centers
- Low Supplied Pressure Irrigation Systems
- Energy Saving Irrigation Systems

Operation:

Line Pressure **[1]** is applied to the Control Chamber **[2]** through the opened 3-Way Solenoid **[3]**. This creates a superior closing force that moves the Diaphragm Assembly **[4]** toward a closed position. Closing the solenoid causes it to discharge pressure from the control chamber, thereby opening the valve.
