

TOP PILOT PRESSURE REDUCING VALVE

With 3-Way Trio Solenoid Control

Model IR-22T-55-3W-X

The BERMAD Top Pilot Pressure Reducing Control Valves with solenoid control offer top performance, compact design and intuitive plug & play operation, thanks to an innovative integrated pilot, equipped with a high resolution adjustment dial for easy, quick & accurate calibration. Model IR-22T-55-3W-X reduces higher upstream pressure to a calibrated constant downstream pressure, regardless of flow fluctuations and opens fully when line pressure drops below setting. The valve opens & shuts in response to an electric signal. *This valve is designated for irrigation use only and not for other uses! Manufacturer warranty is limited to the permitted use only.

Operation:

The Pressure Reducing Pilot [1] commands the valve to throttle closed should Downstream Pressure [P2] rise above setting and to open fully when it drops below setting. The Integrated Trio Selector [2] enables manual closing and opening override or automatic operation, in which the solenoid [3] commands the valve to open or close in response to an electric signal.
